For the letter to Congressman Green, Sam's wanted us to include language "accepting the comments and recommendations in the letter. He also asked where do we respond to the Harris County comments".

I did not want to go into details that the Congressman also sent letters directly to the National Remedy Review Board and that the Harris County letter also was sent to EPA to submitted to the NRRB. I just wanted to address Sam's comments and state in the letter that we will do that. Here is the language (highlighted in yellow) I added to the letter. Please feel free to change it (add/delete, reword) as needed. Please provide comments as soon as you can so that can clear the control.

Thanks CAS
